

Camp Kindness Enhanced Health & Safety Protocols

Policies for preventing and responding to COVID-19

Our Camp Team

We are back! Here we come summer 2021. These protocols have been updated in response to the current public health climate, MA Department of Public Health *Recreational Camps and Programs Health and Safety Standards for Reopening* and best practices. To best ensure the safest camp experience for those working at and attending Camp Kindness please read through and adhere to our policies and daily procedures. Please note that this document may and will be updated if state regulations shift or change.

Please Stay Home if You Are Sick

We ask that you help us protect the health of campers & staff this summer. Anyone who is sick or was sick with COVID-19 or recently in contact with someone with COVID-19 in the last 14 days— including staff, campers, and families— should not come to camp. Be on the lookout for symptoms of COVID-19, which include fever, cough, shortness of breath, chills, muscle pain, sore throat, and loss of taste or smell. Call your doctor if you think you or a family member is sick.

Camp Family Morning Procedure & Curbside Camper Drop-Off

Each morning before camp, all camp families will be asked to complete an online self-screening for all common signs and symptoms of COVID-19 as well as attest that no one in their household has tested positive for

COVID-19 or been a close contact. For each child attending camp the family will complete a daily form via Goggle Forms attesting to the fore stated parameters. If any of the questions are answered with a yes, the child will not be allowed to attend camp. The child will remain/return home with their parent or caregiver and may not return for up to 14 days or until additional guidance is provided by the child's physician and/or the local board of health. These scenarios are considered on a case-by-case basis.

As each family arrives at the Y for morning drop-off, they will be asked to drive up to the side of the Y next to our outdoor pavilion, where we will have a curbside drop-off lane. Please allow time in your morning for this process. When it is your family's turn you will advance in your car to meet a Y staff member. The staff member will access the camper's morning self-screening to ensure this as been completed. The camper will be signed in and immediately asked to hand sanitize. The camper will then be escorted to their camp unit/family, upon which time they will be asked to wash their hand with soap and water. Camp staff have been trained to continue to monitor all campers throughout the day for signs & symptoms. The camp staff assisting with curbside drop-off will hand sanitize between each camper drop-off as well as wear be wearing a face mask.

Curbside Pick-up

Once you arrive at the Y of MV please park along side of the building in the same area where drop-off took place, near our outdoor pavilion. Each family will be given a sign with their camper's name & unit that they can display in their windshield. Camp staff will acknowledge your arrival and will retrieve camper(s) from their unit(s) and bring them to the parent/guardian vehicle. The adult picking up the child must please wear a mask. Please allow campers and staff time to gather camper belongings and safety exit the facility. Each camper will be brought to

their individual car. Campers will sanitize their hands immediately before exiting the program space. We also recommend you hand sanitize your camper(s) after they enter your vehicle or before entering the home.

What to Bring to Camp & What to Leave at Home

Please send your child to camp with a backpack or sealable bag that contains a lunch with cooler pack as well as additional snacks for morning & afternoon, a bathing suit, towel, water bottle, sunscreen, 2 clean face masks or coverings, and a change of clothes. Staff members will assist campers in sunscreen application at camp while wearing gloves. **Please label all personal items with your child's name.** All items will be sent home daily and should be laundered. Soft items and toys from home will not be permitted. All items must be able to fit inside the backpack/bag. Once at camp, each camper will have their own basket to store their backpack and lunch that will not touch the gear of other campers.

Camper Unit/Family Organization

Physical distancing will be enforced between camper units/families and there will be no mixing of units. Each camper unit/family will consist of 15-20 campers and 2-3 staff members. The units will be consistent for each two-week session. Floating and specialty staff will be limited. Children do not naturally physically distance and they require warmth and close contact with staff. Best efforts will be made to maintain physical distancing practices. Individual play will be encouraged when possible, with camp staff providing interesting materials around the room or open space to encourage it. Campers will spend most of their days outside (weather permitting).

Mask Wearing: Who & When

“Staff & campers must wear face masks/coverings as required by the Governor’s most recent Order on Face Coverings in Public” – *Recreational Camps*

and Programs Health and Safety Standards for Reopening

Parents/caregivers: Please wear your mask for curbside drop-off & pick-up, even though you will be remaining in your vehicle. If you must enter the premises of the camp or Y facility, please wear your mask.

Campers: Campers are required to wear a face mask or covering. We will “schedule times & locations for mask breaks, which will be outside when possible. During this time, we will ensure 6 feet of distance is maintained between individuals.” – *Recreational Camps and Programs Health and Safety Standards*

for Reopening. Campers will remove masks to eat & swim.

Staff: Camp staff will be required to wear a face mask or covering at all times. Mask or face coverings will be required during drop-off and pick-up. Gloves will be worn when assisting in with changing, assisting in opening food packages, when applying sunscreen, when administering medication & performing first aid. They will be changed in between use properly; hands will be washed in after use.

Staff Health, Safety & Protocols

Each day staff will self-screen and attest that they do not have any signs or symptoms of COVID-19 and no one in their household has tested positive for COVID-19, just as all campers will be asked to do. Staff will have new or newly cleaned mask or cloth face covering each day at camp with extra masks always available to them in case of soiling. Each camper unit/family will have 2-3 assigned staff for the entirety of each 2-week session. Camp counselors will be teaming up with our Housekeeping Staff to keep all camp areas clean and to continue disinfecting tables, chairs, equipment, and all frequently touched surfaces throughout the camp day.

Camp Kindness Spaces & Materials

Each camper unit/family will have its own designated outdoor and indoor space. Any spaces that will be used by different units/families throughout the week/day will be cleaned in between each units/family's use. Toys and equipment will be limited to items that can be easily disinfected. Toys will be adequately disinfected between uses by each camper unit/family. Each camper will have their own Camper Kit with their own supply of crayons, pencils, scissors, fidgets, etc. for their own personal use, so that equipment such as this is not shared. Counselors will have access to cleaning and sanitation supplies at every program area. Handwashing will be done before transitioning into different spaces and hand sanitizer will always be readily available, in all spaces, and at all building entrances.

Handwashing, Disinfecting, Sanitizing

Children and staff will wash or sanitize hands upon arrival to camp, between activities, before and after eating, changing/using the bathroom. Activity materials will be disinfected between each group's uses. Doorknobs, light switches, handles, (high-touch places and spaces) will be disinfected as often as possible throughout the day, including at the beginning and end of the day. Surfaces, such as countertops and tables, will be cleaned and disinfected after each use and will be left wet after disinfecting to accommodate the disinfectant's stated dwell or contact time. Toilet handles and sink handles/faucet will be disinfected between each group's use. The Y of MV Housekeeping Director will track and ensure all cleaning protocol are completed and order cleaning and disinfecting supplies as needed.

Illness Policy

If a child develops any of the following symptoms: frequent cough, sneezing, fever, difficulty breathing, chills, muscle pain, headache, sore throat, gastrointestinal symptoms, abdominal pain, unexplained rash,

overwhelming fatigue, or recent loss of taste or smell during the day, the child will be immediately moved to our isolation space. One Y of MV staff members will remain with but distanced from the child. The parent/caregiver will be notified by the camp administrative team; if parent/caregiver is not available immediately, emergency contact and authorized pick-up adult will be used. The child will remain/return home with their parent or caregiver and may not return for up to 14 days or until additional guidance is provided by the child's physician and/or the local board of health. Staff or campers with household contacts with adults or children with COVID-19 must be quarantined for 8-14 days after their last household exposure (this will be determined by the local board of health). For most, this will be 8-14 days after the household contact with COVID-19 is released from isolation.

Positive Case of COVID-19

If a staff member, child or child's family member comes into contact with someone who is positive for COVID-19, that person is required to notify the Camp Director and will be asked to self-quarantine for 14 days and to consult with a healthcare professional. If a camper's family member is exposed, the child attending camp must remain out of camp for up to 14 days or whatever length of time directed by the local board of health. In the event that either a staff member or a child who has been present at camp tests positive for COVID-19, we will immediately contact our local board of health for further guidance. We will communicate the information regarding any positive cases to all camp staff and families.

Communication

Communication will occur between camp leadership and parents/caregivers via email, phone calls, and text messaging. The camp leadership will communicate with parents regularly and clearly regarding any changes to program and policies and will provide updates regarding health information in a timely manner (i.e., illness or virus diagnosis at

the facility). Parents/caregivers who need to reach camp leadership during the camp day should please call.

Staff & Camper Family Important Considerations to Take Outside of Camp

We ask each of our participating families as well as our staff to please make responsible decisions outside of the camp day/week to limit your and your family/household exposure to the extent that you can. Please remember that what you choose to expose yourself or your family to throughout your summer is also what you will bring to camp and there, potentially expose others. If we do get a confirmed case in either our staff or campership it is likely that our local board of health will ask us to close down part of the program for a number of days. This closure would result in a number of families not having childcare and staff not having an opportunity to work. Please remember these penetrating implications as you make decisions throughout your summer. We thank you for taking this responsibility seriously.
